## The One Towelling®

Inspired by the beautiful colours of Cuba, The One Towelling® is created with the finest cotton found in Latin-America. To achieve our characteristic softness, the cotton is combed before being rolled and dyed. A technique which is very unique and important for our desired quality. For our production process we use multiple AIRO®24 machines. This machine is the ultimate textile finishing machine for washing, drying and softening of any kind of woven, non-woven and knitted fabric.

We also have an automatic stitching machine, to help achieve more consistency in the size and characteristic hem. Both machines help achieve a product better than before!

Our production department consists of the following machines:

- 26 weaving machines for perfect sized products
- 18 MCS dyeing machines for the most beautiful colours
- 4 AIRO®24 machines for ultimate softness and anti-shrink
- 4 automatic stitching machines for fast production, precision and quality

The One Towelling® makes use of an own water purification platform. This is a massive development for our environmentally responsible business. The platform also contribute to better values, process and quality of the products. Due to the fair and developed production process, our factory is completely OEKO-TEX® Standard 100 certified. The products of our organic range are Global Organic Textile Standard (GOTS) certified. The One Towelling® believes in bright and fresh colours in combination with unbelievable softness. That's why we are The One!

A photograph of a man and a woman sitting on a couch, both wearing bathrobes. The woman, on the left, has long blonde hair and is wearing a light-colored bathrobe, smiling warmly at the man. The man, on the right, has dark hair and a beard, wearing a green bathrobe, looking back at her. The background is a bright, out-of-focus interior space. The word "BATHROBES" is overlaid in white, bold, sans-serif capital letters, centered between two thin white horizontal lines.
